PROFESSIONAL PROFILE

Computer Engineering professional with experience in technical fieldwork, online service delivery, customer support, and team and project management. Proven ability to organize teams, lead service operations, and develop creative, practical solutions when technical or customer-facing challenges arise. Founded an independent digital-services business and built its website after progressing into leadership roles at MitchCactus.com. Self-taught in sound design using Ableton and FL Studio, combining technical ability with a creative and adaptable approach to work.

PROFESSIONAL EXPERIENCE

Independent Digital Services Business

Founder & Service Provider | 2024 - 2025

- Founded a self-made business in the digital services sector, building a website used to present, provide, and sell its services.
- Provided services directly to customers, taking responsibility for completing their orders and communicating with them throughout the process.
- Managed the day-to-day service work independently, including responding when an order or customer request needed attention.

MitchCactus.com

Head of Services & Customer Service | Project & Team Manager | 2020 - 2024

- Delivered purchased services and completed incoming customer orders, developing hands-on experience with the service process and customer expectations.
- Investigated technical and service issues, identified workable solutions, and shared those solutions with the team so they could continue fulfilling orders.
- Responded directly to customers who had questions or problems with purchased services, helping resolve their concerns and keep communication clear.
- Managed and organized the services and customer service team, assigning responsibilities, coordinating workloads, and supporting consistent service delivery.
- Led the department as the main point of contact for operational challenges, guiding team members and making decisions when issues required resolution.

MIQIAS | Erbil, Iraq

Equipment Calibration & On-Site Technical Services | 2019 - 2020

- Performed equipment calibration and worked with devices on site, paying attention to accurate operation and technical requirements.
- Assisted with troubleshooting device-related issues during site visits and coordinated with customers and colleagues as needed.

TECHNICAL & PROFESSIONAL SKILLS

Tools, programming languages, and working strengths

EDUCATION

European University of Lefke, Cyprus | Computer Engineering

PROGRAMMING & DEVELOPMENT

C# - Object-oriented programming and software development.

Python - Programming and scripting for practical problem-solving.

C++ - Programming with attention to logic and performance.

Java - Object-oriented programming and application fundamentals.

SwiftUI - Building user interfaces for Apple platforms.

Unity - Developing interactive applications and digital experiences.
